APPENDIX 15.3

NATIONAL MUSEUM FILES

The topographical files of the National Museum of Ireland (NMI) were consulted for all townlands, which will be crossed by the proposed route options. The topographical files contain the reports, including correspondence, present location and occasionally, illustrations of material recovered prior to 1975. The information on the material recovered post-1975 is now computerized and both sets of records were searched. The year cited in any report refers to the year of acquisition by the National Museum of Ireland rather than the year of discovery or excavation.
